

# PRO COLLECTION DETAILS

**PRO Collection details are carefully thought through. Here are a few that make all the difference...**

## Hide-a-way handles

Clever design produces a style so streamlined you'll need to look twice to see just how these handles stow away.

Parallel zipper tracks give you the choice to either have the handles in use or not and still neatly close the bag. The upper zippers close the bag and stow the handles away. Alternatively, the lower zippers close the bag and give access to the handles.

All exterior zippers are designed with a smooth reverse closure system that creates an external and internal water resistant zipper cover eliminating the traditional cumbersome zipper flaps that often jam the zipper. All zippers are self-healing with metal sliders.

## Tripod Mounting Systems

The PRO Collection offers bags readily able to attach tripods of various sizes.

## Adaptability

Removable inserts for specific functions protect and consolidates your gear. Remove the insert and you have a stylish piece of luggage or garment bag.

## PRO Security with Style

Elegant design, a unique zipper system and quality materials make for top class bags. Great looking yet discrete. A classic range of bags to securely protect and transport your equipment.

All PRO bags are supplied with padlocks which loop through the lockable zippers.

## Organization

Multi-pocketed organizer sections within each bag are carefully thought through to provide secure transport for a wide range of accessories.

## Extreme Weather Cover

Extra protection in extreme weather conditions; rain, sand, dust, snow is assured with the extreme weather cover which stows away in a zippered pocket when not in use.

## Strong and stable

The PRO collection has shock dispersing air-channeled hard plastic bottoms with shock absorbing closed-cell foam padding to help ensure the integrity of your gear. Plus with rubberized feet to grip, they are completely stable.

## Large Side Pockets

Room enough to hold, protect and organize.

## Detachable Film Pouch

Stow away your exposed film in a secure pouch. Simply remove the pouch, keep the film together, and dispatch for processing.

## Padded Shoulder Straps

A 2" wide adjustable shoulder strap with a padded skid proof ergonomic shoulder pad ensures comfort and protection. The straps are sewn completely around the bag for strength and then covered with the outer fabric leaving only the eye hooks exposed to attach the removable part of the strap. The bag looks streamlined and smooth yet underneath the construction lies the hidden strength.

## Classic detail

Inside and out the PRO collection has classic clean lines. Even the material used throughout the inside is elegant, a repeat pattern of Delsey over a fine gray material.

## Removable and modular interiors

The padded modular interior dividers are completely flexible to fit your individual requirements. For protection of electronic accessories and digital media a woven anti-static mesh is used.
